

STARTUP PITCH DECK

AGRIPACK SOLUTION

Converting Pakistan's agricultural waste into
premium biodegradable packaging

- Hunzala Najam – CEO
- Muhammad Rohaan Khan – COO
- Abdullah Irfan – CFO

ENTREPRENEURSHIP

Instructor: Aiman Rizan

THE PROBLEM

AGRIPACK

Pakistan's twin environmental crisis

ENVIRONMENTAL CHOKE

Pakistan's plastic pollution is reaching a breaking point, damaging ecosystems beyond repair.

“PAKISTAN IS SUFFOCATING IN PLASTIC.”

THE SMOG CRISIS

Farmers burn sugarcane bagasse because it has "no value," fueling the toxic smog crisis every year.

“OUR FIELDS ARE BURNING IN SMOG.”

THE SUSTAINABILITY GAP

Industries are under pressure to go green but lack affordable, local alternatives to plastic.

“ TONNES OF CROP RESIDUE BURNED YEARLY IN PUNJAB”

ABOUT AGRIPACK

WHAT WE DO

AgriPack is a next generation Circular Economy startup that converts Pakistan's agricultural waste rice husk and wheat straw into **100% biodegradable, food-grade packaging**. We replace harmful plastic with strong, cost-competitive products made entirely from local resources.

**Our Mission**

Eliminate plastic dependency, convert waste into value, and support farmers

**Our Vision**

Eco-friendly packaging as the new global industrial standard

**Business Model**

B2B and B2G — scalable, contract-driven, profit-oriented

A MASSIVE GROWING MARKET

\$248B

Global Biodegradable Packaging Market by 2030
Growing at 6.1% CAGR annually

PKR 600B+

Pakistan Packaging Industry (2024)
Rapidly shifting toward eco-friendly solutions

127+

Countries enforcing plastic bans
Creating urgent demand for alternatives

TARGET SECTORS

	<u>Restaurants & Cafes</u>	28%
	<u>E-Commerce & Delivery</u>	22%
	<u>Pharma & Hospitals</u>	18%
	<u>Supermarkets & Retail</u>	17%
	<u>Government & Public Sector</u>	15%

WHY NOW?

01

Plastic Bans Accelerating

127+ countries have banned or restricted single-use plastic. Pakistan's own ban creates immediate demand.

02

ESG Pressure on Businesses

Corporations globally are mandated to adopt sustainable supply chains. Green packaging is no longer optional.

03

Pakistan's Environmental Crisis

Seasonal smog from crop burning kills thousands. Farmers need alternatives — AgriPack pays them for their waste.

04

Export Demand Surging

GCC and European markets actively seek certified biodegradable packaging suppliers from developing economies.

The window of first-mover advantage in Pakistan's biodegradable packaging sector is open right now. AgriPack is positioned to seize it.

METHODOLOGY

AGRIPACK

From field to finished product

Raw Material Sourcing

Rice husk and wheat straw collected from Pakistani farmers

Cleaning

Sorting and washing to remove dirt and impurities

Processing

Pulping and binding fibers into composite material

Molding

Heat-pressing into boxes, containers and custom shapes

Production

QC-checked products dispatched to B2B and B2G clients

MANUFACTURING FLOWCHART

● Collection & Processing Phase

● Manufacturing & Distribution Phase

Circular Model: Waste from farmers → premium biodegradable packaging → distribution to businesses — zero landfill output.

RAW MATERIAL TRANSFORMATION

RAW INPUTS

Rice Husk

Silica-rich outer shell — provides rigidity and heat resistance

Most abundant

Wheat Straw

Long cellulose fibers — adds flexibility and structural strength

High yield

Sugarcane Bagasse

Fibrous residue after juice extraction — binds pulp naturally

Eco binder

Pulping

Compression

Drying

Shaping

FINAL PRODUCT PROPERTIES

Heat Resistant

Up to 120°C

Water Resistant

Eco-coated barrier

Biodegradable

Fully in 90–180 days

Food-Grade Safe

No chemicals or BPA

Structural Strength

Comparable to plastic

BUSINESS MODEL CANVAS

AGRIPACK

All 9 building blocks — AgriPack's complete business architecture

KEY PARTNERS

- Pakistani farmers (raw material)
- Equipment suppliers
- Govt. sustainability bodies
- Distribution partners

KEY ACTIVITIES

- Agri-waste sourcing
- Manufacturing & QC
- B2B / B2G sales

KEY RESOURCES

- Production plant
- Farmer network
- Process know-how

VALUE PROPOSITION

- 100% biodegradable packaging
- Cost-competitive vs. plastic
- Local Pakistani raw materials
- Farmer income integration
- Strong & durable products
- Circular economy model

CUSTOMER RELATIONSHIPS

- Long-term B2B contracts
- Govt. tender agreements
- Custom branding service

CHANNELS

- Direct sales team
- Distributors
- Govt. tenders

CUSTOMER SEGMENTS

- Restaurants & food chains
- E-commerce businesses
- Supermarkets & retail
- Pharma companies
- Govt. programs
- Hospitals & municipal

COST STRUCTURE

- Raw material procurement
- Plant & machinery CAPEX
- Labour & operations
- Distribution & logistics

REVENUE STREAMS

- Bulk product sales (B2B)
- Government contracts (B2G)
- Custom branded packaging orders
- Export sales (future)

CUSTOMER PROPOSITION

AGRIPACK

Who we serve?

B2B

Business to Business

Restaurants & food chains

E-commerce businesses

Supermarkets & retail

Pharmaceutical companies

B2G

Business to Government

Government sustainability programs

Public hospitals & clinics

Municipal waste systems

COMPETITOR ANALYSIS

Feature	AgriPack 🌿	Plastic 🏠	Paper 📄
Biodegradable	✔ 100%	✗ No	△□ Partial
Eco Friendly	✔ Full	✗ No	△□ Moderate
Heat Resistant	✔ High (120°C)	△□ Medium	✗ Low
Water Resistant	✔ High	✔ High	✗ Low
Raw Material Cost	✔ Very Low	✗ High	△□ Medium
Local Sourcing (PK)	✔ Yes	✗ Imported	△□ Partial
Environmental Impact	✔ Very Low	✗ Very High	△□ Medium
Farmer Integration	✔ Yes	✗ None	✗ None
Food-Grade Safe	✔ Yes	△□ Sometimes	✔ Yes

USPs & ADVANTAGES

AGRIPACK

Why AgriPack wins

01

Dual Problem Solver

Addresses plastic pollution and agricultural waste mismanagement in one circular model

02

Local Resources, Local Impact

100% Pakistani raw materials — lower cost, stronger community benefit

03

Farmer Integration

Farmers earn additional income from waste they would otherwise burn

04

Cost-Competitive

Sustainable packaging without the premium price tag

REVENUE MODEL

B2B Long-Term

45%

Contracts

Restaurants, cafes, food chains, e-commerce firms on monthly or annual supply agreements

B2G Government Tenders

25%

Hospital systems, public sector canteens, and municipal supply tenders

Custom Branded

15%

Packaging

Manufacturing for logo-printed, size-customized packaging for brands

Export (GCC & Europe)

15%

Certified biodegradable packaging sold to international markets at export margins

PRICING MODEL

- Bulk pricing: 10–40% below plastic alternatives
- Subscription supply: guaranteed monthly volume
- Custom orders: premium 20–30% margin
- Export FOB pricing: certified compliance rate

UNIT ECONOMICS

- Raw material cost: ~PKR 8–12/unit
- Production cost: ~PKR 15–22/unit
- Selling price: PKR 35–65/unit
- Gross margin: **45–55%**

GO-TO-MARKET STRATEGY

Online Strategy

- LinkedIn B2B outreach targeting procurement managers
- Sustainability-focused social media campaigns
- Content marketing around eco-packaging trends
- Website with bulk quote & sample request portal

Offline Strategy

- Trade exhibitions & sustainability expos in Pakistan
- Direct partnerships with restaurant chains
- Government tender applications (hospitals, canteens)
- Farmer cooperative partnerships for raw supply

Sales Strategy

- Long-term annual supply contracts (B2B)
- Bulk pricing tiers: 30–40% savings on volume
- Subscription model — automated monthly delivery
- Free sample kits for onboarding new clients

Phase 1 (0– 6 months)

Pilot with 3–5 local restaurants & cafes, generate testimonials

Phase 2 (6– 18 months)

Scale B2B contracts, apply for government tenders, regional expansion

Phase 3 (18+ months)

Launch export operations to GCC, achieve ISO certification

FINANCIAL PROJECTIONS

STARTUP INVESTMENT REQUIRED

Machinery & Equipment	PKR 28M
Factory Setup & Fit-out	PKR 12M
Raw Material Stockpile (3 mo)	PKR 6M
Working Capital (6 mo ops)	PKR 9M
Certification & Compliance	PKR 3M
Marketing & GTM	PKR 2M
TOTAL INVESTMENT	PKR 60M

3-YEAR REVENUE FORECAST (PKR MILLIONS)

Break-Even Point
Month 18–22 of operations · Gross margin 45–55% at scale

FUTURE ENHANCEMENT

The road ahead

01 QR-Based Tracking

Full supply chain transparency — customers scan packaging to trace its agri-waste origin

02 Custom Branding

Bespoke packaging with client logos and brand identity — a premium tier offering

03 Export Expansion

Scaling beyond Pakistan to regional and global eco-packaging markets

SOCIAL & ENVIRONMENTAL IMPACT

500,000+

Plastic items replaced per year

At full capacity, AgriPack displaces over half a million single-use plastic pieces annually

40% less

Crop burning in partner farms

Farmers sell waste instead of burning it — directly reducing Pakistan's seasonal smog crisis

200+

Farmers directly empowered

Partner farmers earn additional income selling rice husk and wheat straw — zero waste burned

BROADER IMPACT

Job Creation

50+ direct manufacturing jobs in rural Pakistan within first 2 years

Carbon Footprint Reduction

Bio-based materials produce 60% less CO₂ vs. petroleum plastic in production

Circular Economy Model

Farm waste → packaging → compostable disposal → soil nutrients. Zero landfill.

SDG Alignment

Contributes to UN SDGs: 12 (Responsible Consumption), 13 (Climate Action), 8 (Decent Work)
